## DAY 10 - DAILY TASK

Create a swift program using error handling concepts for appealing a traffic ticket based on the following criteria.

1. If ticket type is "speeding":
   If speed was 50 over the limit then disapprove, otherwise decrease the fine amount by 100.
2. If ticket type is "red light brake":
   If driver licence issued within 3 years then disapprove, otherwise decrease the fine amount by 100.
3. If ticket type is "seat belt":
   If passenger present in car then disapprove, otherwise decrease the fine amount by 100.
4. If ticket type is "invalid licence" then disapprove.
